

# An Introduction to BizDevOps

Lazar Cerovic

“  
Every company is now a  
software company

– *Jeff Immelt, CEO of General Electric*

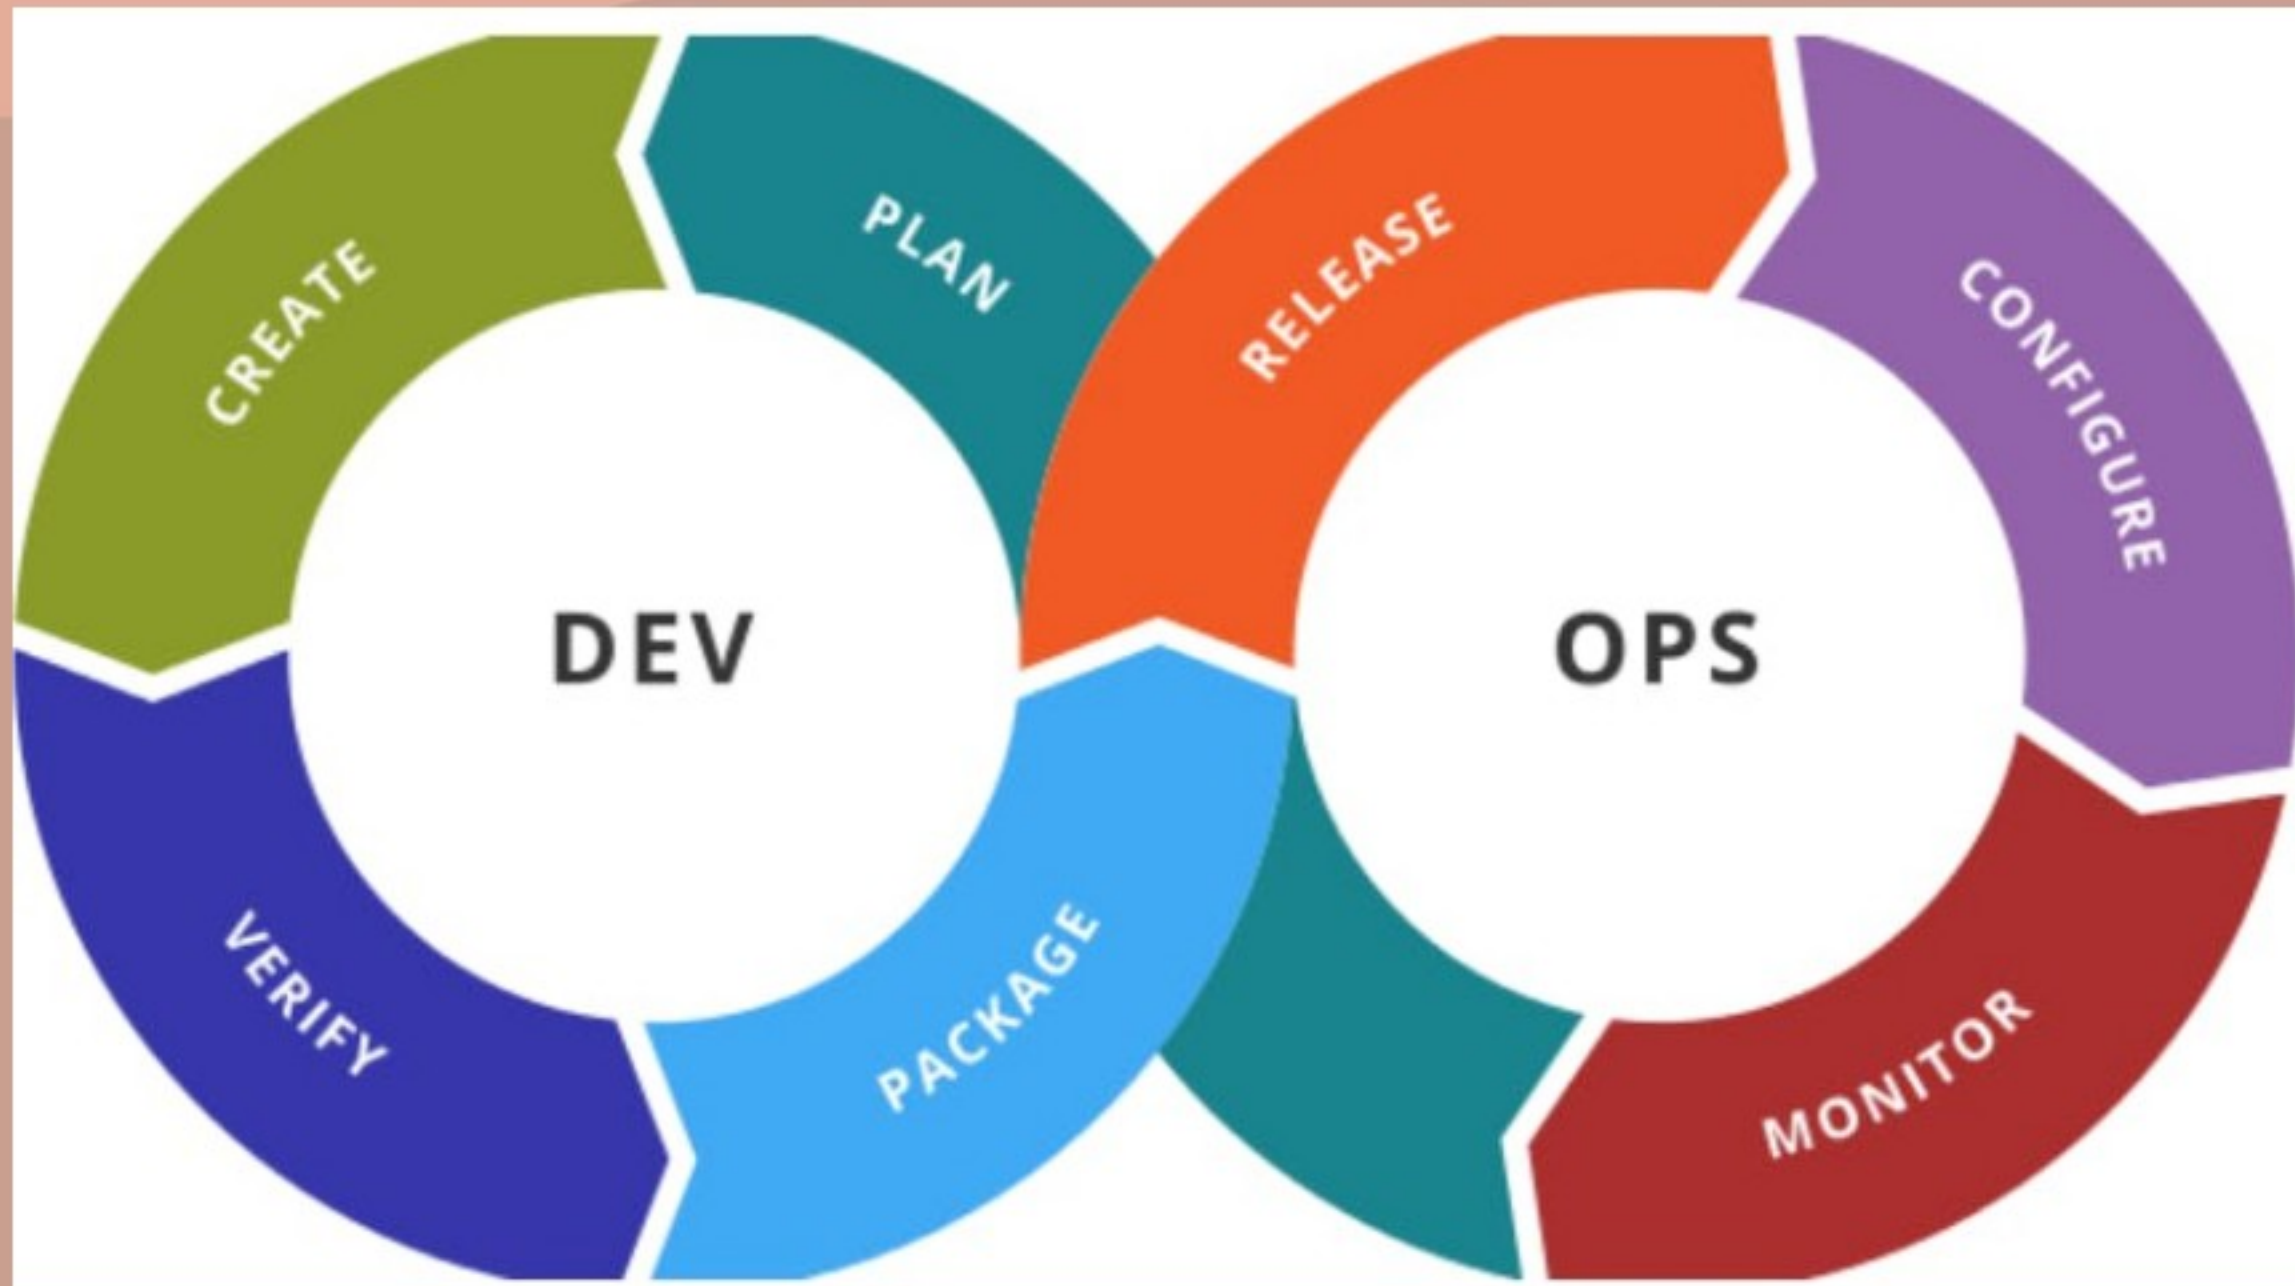

# Quick Background: Agile Methods

- Dev-process is divided into iterations.
- Fail often and early

# DevOps

- Combination of the IT operation with the development team
- Works best with agile methods
- Improves the quality and reduces the time of software development

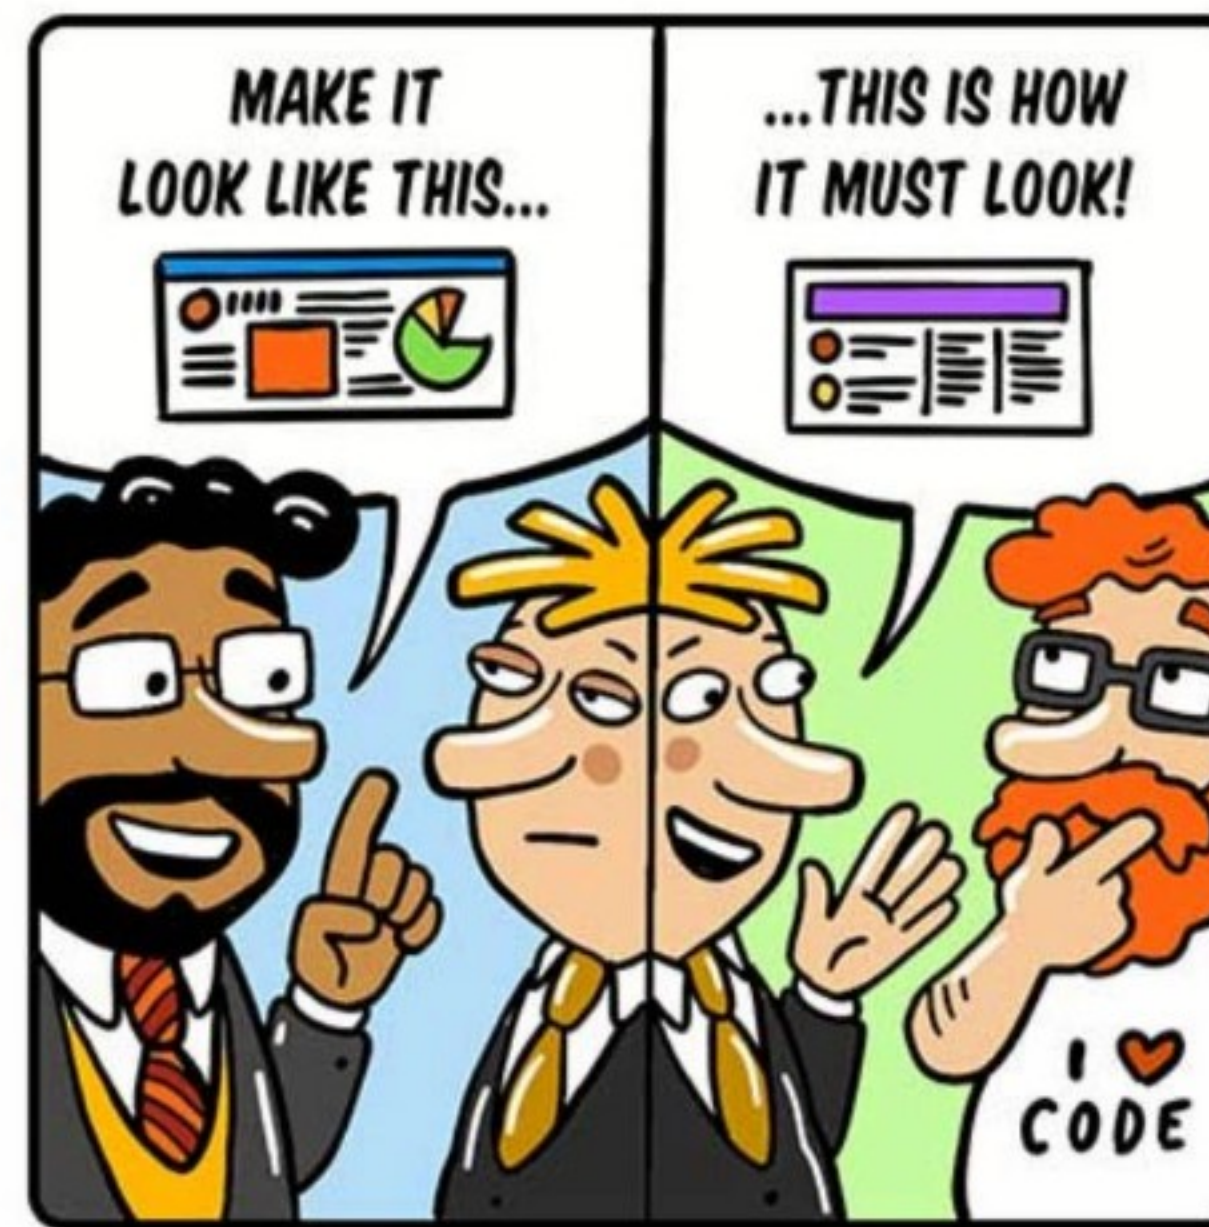

**Is that all?**

# What is BizDevOps?

- Cooperation/coordination between the Operation, developer and business team
- Build the software that will help meet the objectives of the business

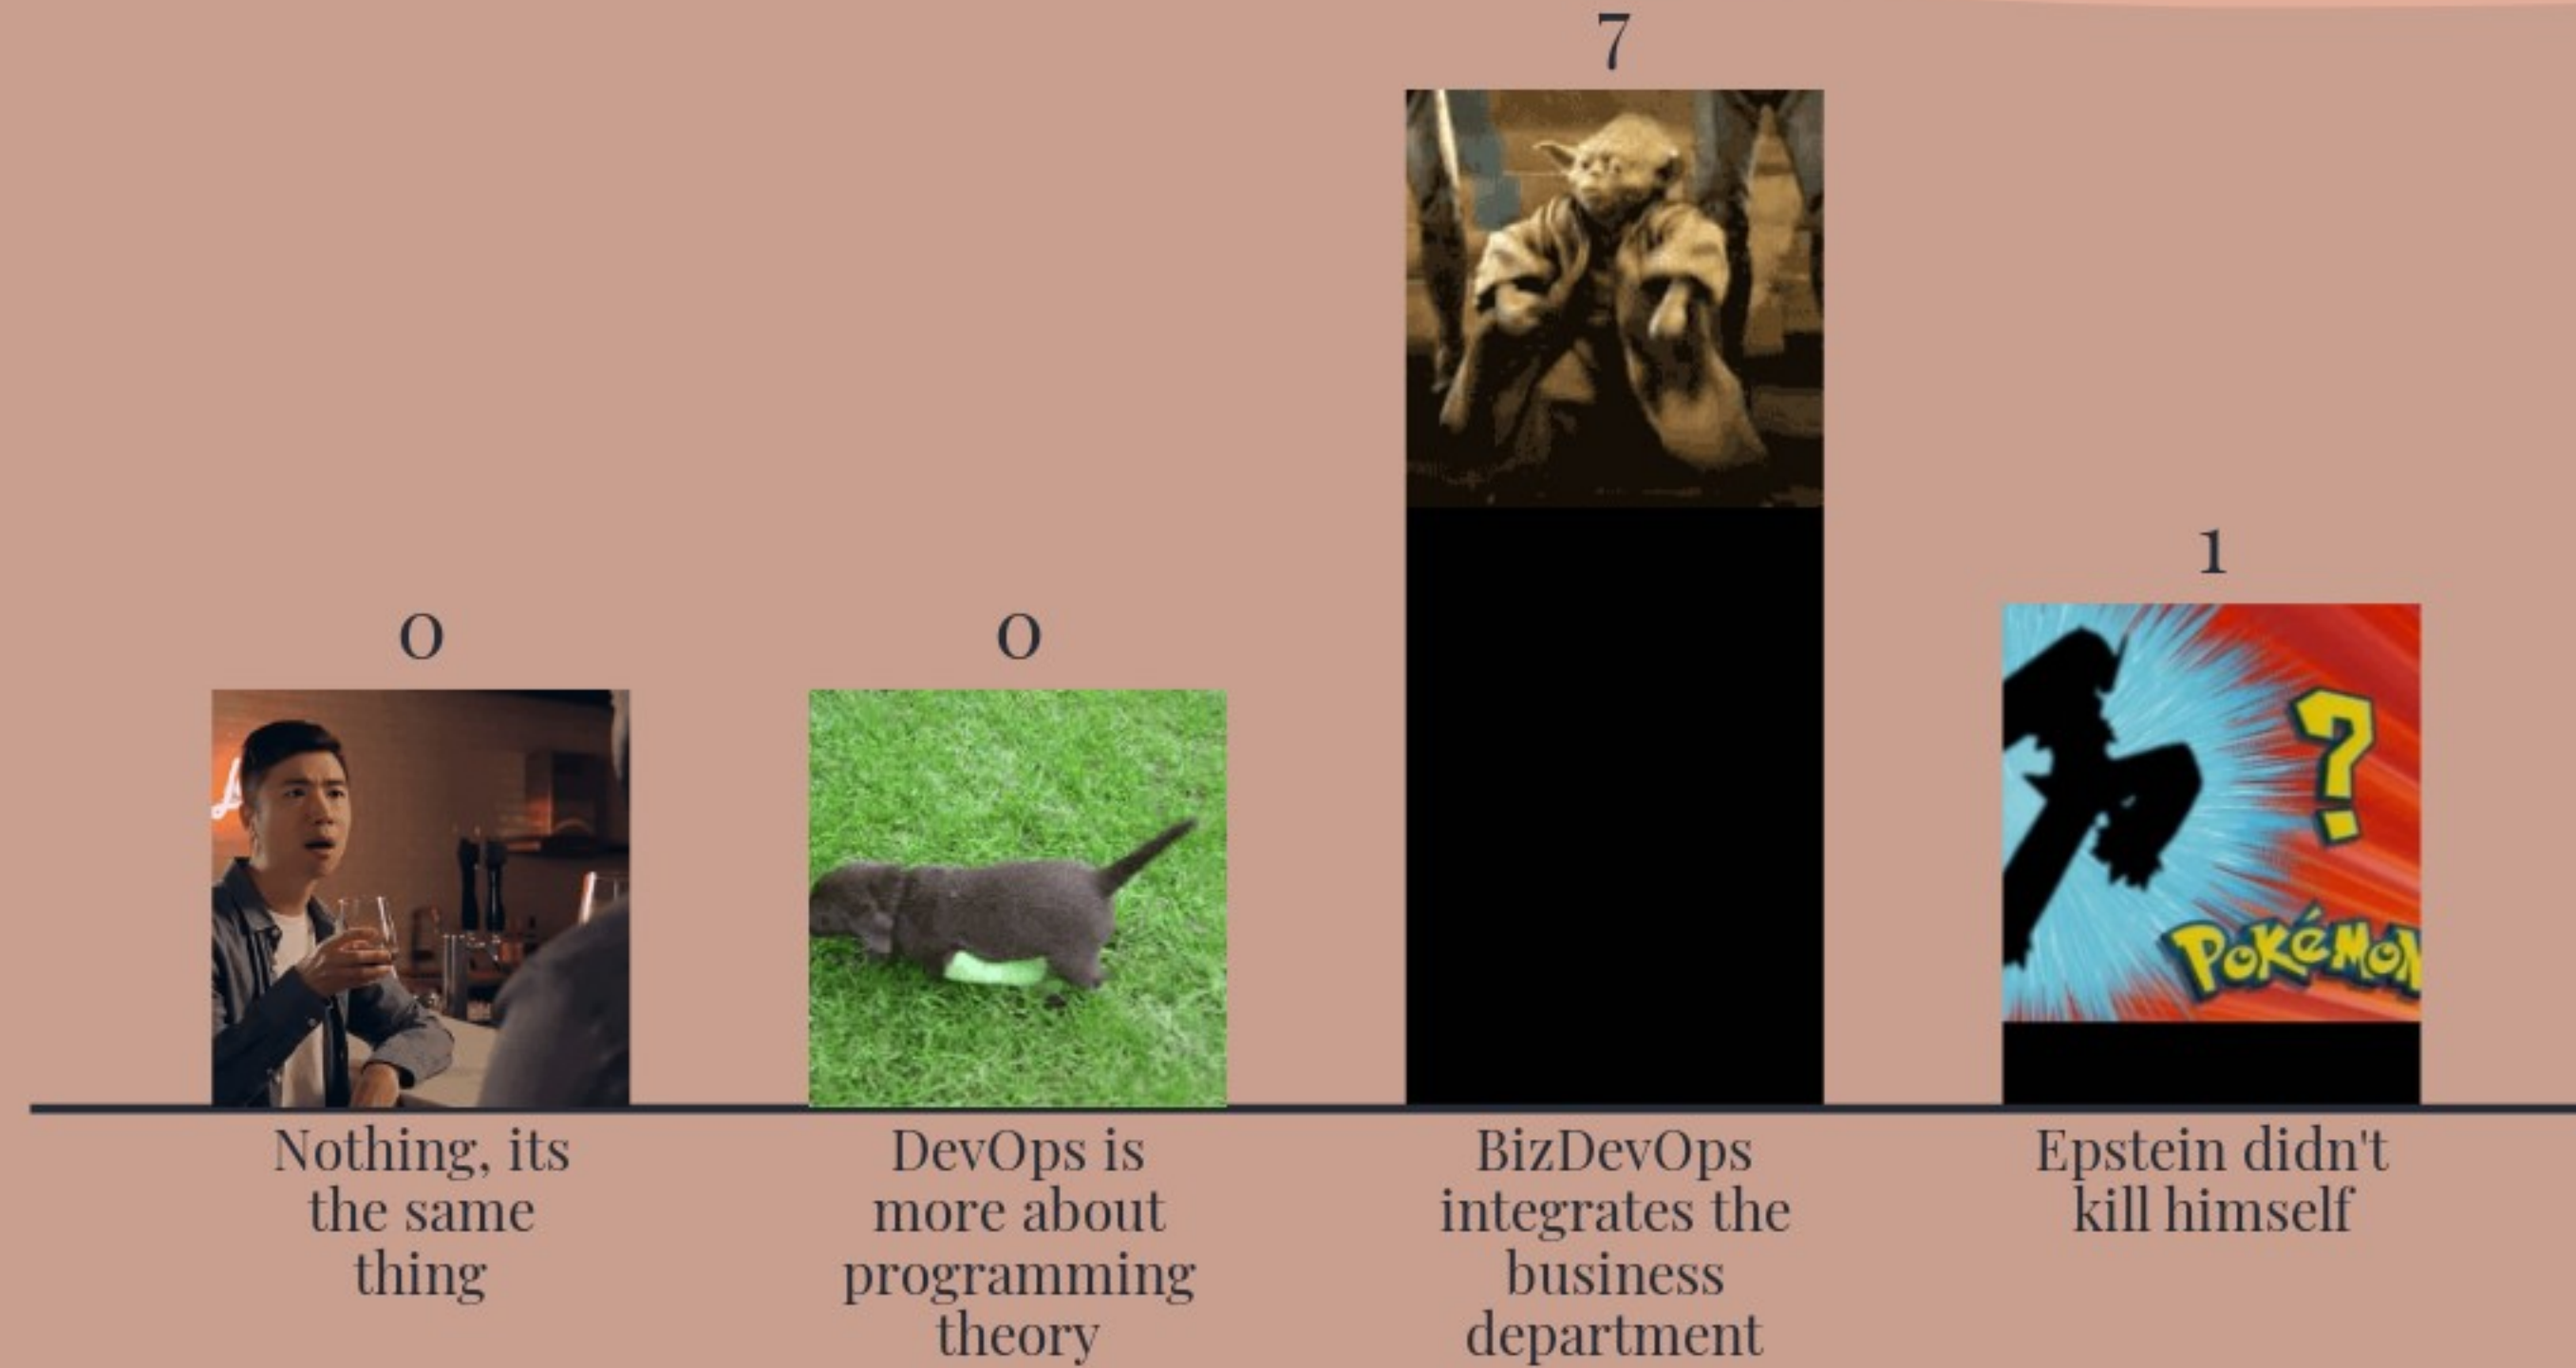

# Tools for BizDevOps

- Application Performance Management tools: Traceview, Microsoft Monitoring, Foglight, Onspring
- Low-code development platforms: Pega, AgilePoint and WaveMaker

# What is the difference between DevOps and BizDevOps?

# Thank you for listening
